Anmol Shrestha

Toronto, ON   anmolsagarshrestha@gmail.com   **437-662-1377**

An ambitious student taking a Software Engineering Technology program, studying the process, methods, and tools to create Artificial Intelligence Software for the Web. With previous experience as a designer and front-end developer, expanding technical horizon towards Artificial Intelligence Application.

PROFESSIONAL SUMMARY

- Solid understanding of the philosophy of Deep Learning and and technical fundamentals of Deep Learning architectures
- Have practiced Software Engineering Technology by communicating and planning with business owners on their web development project.
- Designed and developed responsive and performant websites with user-centered design
- **Technical Skills: Web Development**
- **Design Skills: Figma**

SELECT PROJECTS

Voice Assistant (using OpenAI API and ElevenLabs API)
- developed a simple voice assistant using OpenAI API(GPT 4o mini) and whisper-1
- Used ElevenLabs API to convert text to human sounding voice

Bookmarklet (Skip Youtube ads)
- developed a simple book marklet using Javascript DOM API to manipulate youtube to skip ads when clicked

Bookmarklet (Skip Youtube ads)
- developed a simple book marklet using Javascript DOM API to manipulate youtube to skip ads when clicked

WORK EXPERIENCE

MATH TUTOR(Centennial College)   **Winter 2023 - Present**
- Communicated with the student to understand how solid their understanding of the given topic was and used analogies which helped the student understand the problem better
- Created different versions of the same problem by adjusting the variables so that the student can gain an overall better perspective of the problem

Anmol Shrestha

Toronto, ON   anmolsagarshrestha@gmail.com   **437-662-1377**

- Created comfortable and safe environment for the student to ask questions and be motivated

FRONT-END INTERN (RADIENT INFOTECH)   **Winter 2023 - Present**

- Communicated with manager and team member to discuss the requirements
- Refactored HTML templates and modified CSS to fit the client's business needs
- Deployed to the server using cPanel

EDUCATION

Software Engineering Technology - Artificial Intelligence (co-op) Advanced Diploma
Centennial College, Toronto, ON

Courses:

Client Side Web Development   Software Engineering Fundamentals & Requirements
Object-Oriented Programming(C#)   Communication   Design Principles and Practice
